RULES & REGULATIONS

PETROSAINS RBTX CHALLENGE 2019

1kg Category

A. Definition of a match

A match involves two contestants (one operator per robot can be registered, but may be assisted by their mechanic/team) who start the robot that they have made themselves in the Ring according to the Game Rules.

Participants must be between 6 to 17 years old.

The contest continues until a robot falls out of the Ring or the match time limit is reached. Any decision to end the match will be made by the referee.

B. Ring Interior

- The Ring interior is a circle Plywood plate with a minimum height of 2.5 cm and a diameter of 100cm including the border line (refer to appendix A). It has a black matte surface.
- The border line is indicated as a white circle with a width of 3cm. "On the border" is defined as being within the interior of the Ring.
- Shikiri lines (starting lines) consist of two painted parallel brown (or equivalent for absorption of IR light) lines centred in the ring with appropriate width and spacing. The separation distance between the lines is measured to their outside edges.
- During the games, it is up to the referee to decide whether the Ring can continue to be used or whether it should be changed when a scratch or tear appears on the Ring surface.

C. Ring Exterior

There will be a space appropriate outside the outer edge of the ring for the referee and contestants. This space will be of different colours, and of any material or shape as long as the basic concept of these rules are not violated.

D. Specifications of the robot

- The robot (when all parts are fully extended) must be able to fit in a box with a width and depth of 15cm x 15cm x 15cm (W x L x H).
- Weight (including accessories) must not exceed 1000g.
- The robot must be self-operated (autonomous) with a start button on the robot body.
- There are no restrictions on the microprocessor used for the robot.

E. Restrictions on robot design

- The robot must not be equipped with any parts **that might damage or deface the Ring**.
- The robot must not be equipped with a device that obstructs the opponent's operation, such as a jammer or strobe light.
- The robot must not be equipped with a device that can release liquid, powder or gas.

- The robot must not be equipped with detachable parts or a firing or throwing device.
- The robot must not be equipped with any part that fixes the robot to the Ring surface and increases the apparent weight of the robot (such as suckers, glue, vacuums, fans, and so on).
- The robot must not cause danger to the referee, operators and audience.

F. Game principles

- A game consists of three matches of one minute each. There will be no breaks in between the matches.
- The contestant with the most wins out of the three matches will be the winner of the game.
- In the event of a tie after the third match, the lighter robot will be declared as the winner.

G. Beginning of a match

- Following the referee's instructions, the contestants will enter the Ring area and place their robots (facing any direction) centred behind their starting point.
- At the referee's start signal, the operator must press the start button on their robot. After a 'T seconds' pause, the robots may start moving. During these 'T seconds', players must clear out of the ring area. The 'T seconds' will be announced during the competition day.
- No changes of robot components and batteries are allowed during the match.

H. End of a match

- The match will end when the referee calls the winner or the match time limit is reached.

I. Match cancellation and rematch

- A match will be cancelled for rematch under the following conditions:
 - Both robots touch the exterior of the Ring at the same time.
 - Any occurrence of violations.
 - Any other conditions under which the referee decides that there are no winners.
- In the case of a rematch, maintenance of competing robots are prohibited and the robots must immediately be placed back to the starting point. The one-minute timer will not be resetted.

J. Winning a match

- The robot which manages to push its opponent out of the Ring with a fair action will be declared the match winner.
- A robot will be declared as match winner if the opponent's robot steps out of the Ring on its own (for any reason).
- A robot will be declared as match winner if the opponent is disqualified or has more than one violation.
- The match will be considered a tie if both robots manage to stay in the Ring until the match timer ends.

K. Violations

- The operator enters the Ring before the referee's call to end the match.
- The robot begins action before the referee's start signal or before the 'T seconds' mark.
- The robot does not move at all or is not powered on during the match.
- Any other actions that may be deemed unfair by the referee.
- Warning will be given for the first violation. A second violation will result in disqualification.

L. Disqualification

- A contestant is not present for robot inspection five minutes before the beginning of the game.
- The contestants' robot does not meet the "**Specifications of the robot**" and "**Restrictions on robot design**". For example, robot size is bigger than 15cm x 15cm x 15cm or robot is equipped with parts that will damage the Ring.
- A contestant ruins the game. For example, by intentionally breaking, damaging or defacing the Ring.
- A contestant displays unsportsmanlike behaviour. For example, using rude and offensive language, or injuring an opponent or a referee.

M. Objections

- Contestants with any objection must express the disagreement to the secretariat before the end of the game.
- Objections to the judgment of the referee will not be entertained.

N. Specifications of robot tagging

- Contestants must **clearly display or tag** the registered name or number of the robot during the competition.

O. Injuries and Accidents during the Match

- A contestant can request to stop the game when he/she is injured or his/her robot has an accident which can prevent the game to continue.
- In the event that the game cannot continue due to a contestant's injury or robot is accident, the contestant who is the cause of such injury or accident will be forfeited. When it is not clear which team is the cause of such incident, the contestant who is unable to continue the game, or who requests to stop the game, shall be declared as the loser.
- The game can continue in the event of any injury or accident if decided by the referee and the Committee members. The decision process shall take no longer than five minutes.

P. Miscellaneous

- As long as the concept and fundamentals of the rules are observed, these rules shall be flexible enough to encompass the changes in the number of players and the contents of the matches.

Appendix A

3cm white border
Separation of Shikiri lines 10 cm
Length of Shikiri lines 10 cm
Width of Shikiri lines 1 cm
Diameter of the Ring (*including white border*)
100cm
